

VERTEXX

VERTEXX PUBLIC
SERVICES DIVISION

COORDINATED RESPONSE, SECURED COMMUNICATIONS PLATFORM

PUBLIC SAFETY

Strengthens law enforcement and emergency services with a fully encrypted communication backbone. Real-time push-to-talk, secure video/photo reporting, and integrated geo-location tracking provide enhanced situational awareness. With command-center connectivity, agencies can coordinate seamlessly across departments, ensuring faster response times and stronger community protection.

HEALTHCARE:

Hospitals and medical facilities rely on VERTEXX for emergency coordination and rapid response. Staff can send encrypted voice notes, photos, or video reports directly from smart devices or wearables. Integration with smartwatches allows one-touch SOS activation, ensuring immediate action during critical events and improving patient and staff safety.

RETAIL:

Retail operators use VERTEXX to safeguard staff and customers with instant SOS alerts, live location sharing, and secure two-way communication. Security teams receive real-time updates and can coordinate responses discreetly, ensuring both a safe and welcoming environment.

HIGHER EDUCATION:

Universities and schools deploy VERTEXX to maintain campus-wide safety. With mass notification alerts, secure cross-device messaging, and live personnel tracking, administrators can coordinate responses across large populations. 3D mapping integration supports rapid evacuation and navigation during emergencies.

CONSTRUCTION SAFETY:

Enhances workforce protection with check-in/check-out functionality, live monitoring, and secure communications. Site managers can oversee worker safety in real time and issue immediate alerts. Encrypted communication channels ensure coordination even in high-risk or remote environments.

STADIUMS:

Provides large-scale event security with real-time personnel tracking, group communication, and instant alert distribution. Push-to-Talk allows entire security teams to remain synchronized, while command centers maintain oversight of all incoming reports to ensure crowd safety.

Museums:

Institutions use VERTEXX to protect visitors and staff by enabling real-time secure communications, instant SOS reporting, and staff-to-agency coordination. The platform supports quiet, controlled responses to incidents without disrupting operations or visitor experience.

PUBLIC TRANSPORTATION

Transit systems integrate VERTEXX to provide operators and drivers with direct lines to central command centers. With secure reporting tools, drivers can instantly notify authorities, transmit their live location, and coordinate responses without delay, ensuring passenger confidence and safety.

REAL ESTATE:

Supports building and property management teams with real-time staff monitoring, encrypted communication, and emergency coordination tools. From office complexes to large residential facilities, VERTEXX ensures tenants and staff remain protected under a single unified system.
